

Rail Scrap Retriever

- Magnetically picks up plates, spikes and anchors after the rail has been removed in a rail gang.
- 30" wide magnetic pulley and conveyor picks up scrap and deposits into hopper.
- Hopper dumps to either side of track.
- Conveyor traverses to work on either side where rail has been removed.
- 2 heavy duty crawlers on each side support the machine on the side where the rail has been removed.
- Operation from the cab or walk behind.
- Radio remote control for walk behind operation.
